***Reissue Applications***

1. Although the request for transfer of drawings from the parent application is filed, Applicant is informed that similar requests are made in the other pending divisional reissue application. Accordingly, the drawings will only be transferred to the reissue application no. 09/244,037. Formal drawings will be required for this application.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 13-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Citta et al (5,598,220).

Citta et al discloses a HDTV system wherein synchronization signals are transmitted intermittently with data signals to a receiving circuit. The synchronization signals are transmitted as N-level symbols and data signals are transmitted as M-level symbols where M is

larger than N (see Fig. 2-5, col. 2, lines 16-57, col. 4, lines 20-57). Therefore all the claimed limitations are taught by Citta et al.

4. Claims 13-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Chung et al (5,214,656).

Chung et al discloses a multiplexed coded modulation technique for use in an HDTV system (Fig. 6) comprising the following claimed limitations: "respective constellation" (132, 122), "synchronization data" (col. 3, line 68, "framing information"), "receiver" (Fig. 2).
